The UK representative of Messe Düsseldorf

STAND DESIGN & CONSTRUCTION

From concept to construction, we will be here to help, advise and manage your stand build throughout the process.

We work with you to understand your brief, and we collaborate with the most appropriate stand build partner to provide you with a cost effective and personal solution to meet your requirements and budget.

We've been representing Messe Düsseldorf in the UK for around 30 years. We know the venue inside and out and our main stand build partner is based within the showground itself so we offer first class on-site support as well.

Our dedicated team design and construct everything from simple stand builds, through to bespoke stands or large pavilions.

This makes us the perfect partner to help you achieve your ideal stand build solution.

If you would like to discuss a brief for a design and quote, please contact Emily Martin on:

PAVILIONS & GROUPS

Along with our individual stand construction, we also build for UK Pavilions. We can create a standard build package for your group exhibitors, including additional items they can order to adapt their stand to suit their needs. What to expect for a Pavilion build:

- Pavilion organiser's custom build stand design and quote for their own stand/networking area.
- Standard build package for your group exhibitors priced per square meter, with optional extras to add to their stand (additional items will be charged directly to the group exhibitor).
- An Exhibitor Manual for each group exhibitor will be created and sent out to them directly.
- The overall design and included package items are agreed with you, the Pavilion organiser, and usually consist of: carpet, system walling, table & chairs, cupboard, nameboard with option for their company logo, lighting, electrics, fascia/hanging banner above full pavilion area with group co-ordinator's logo/graphics
- The group exhibitors also have the option to upgrade to a custom build stand (overlay / bespoke). Upgrades to a custom build will be charged directly to the group exhibitor.

Please note, the preparation and lead time for a Pavilion Build is much longer than individual stand builds. Discussions would need to start 6-9 months in advance of the show at a minimum.

COVID19, PROtaction & HYGIENE CONCEPT

As the UK representative for Messe Düsseldorf we have a full understanding of the PROtaction Hygiene Concept that has been created in response to COVID19. This is to mitigate risk, and ensure the shows can run safely in the current climate. We're always up to date with each show's changes or show specific additional measures.

We will work with you to ensure all of the latest requirements are adhered to within your stand build design, so you can rest assured that your design and build are compliant.

There's no need to worry about getting your builders accredited beforehand, as this is already sorted with our build partners.

If you would like to discuss a brief for your stand build, drop Emily Martin a line on:
